## EXPERIENCE

( TOTAL EXPERIENCE : 12YEARS, RELEVANCE TO UI/UX DESIGN : NEARLY 7 YEARS)

### Summary

As a seasoned Product Designer with over 7 years of experience, I excel in crafting innovative, user-centric solutions across industries such as Medical, Well-being, and Real Estate. My expertise lies in leveraging UX research, design thinking, and human-centered design principles to solve complex problems and elevate user experiences.

### Key Achievements

**Product Innovation:** Led the development and enhancement of flagship products including "Elix9", "Foyer-Enterprise Suite", and "Foyer Neo", driving user engagement and increasing satisfaction metrics by up to 25%.

**3D Immersive UX:** Revolutionized the UX for a real estate firm's 3D immersive solutions, resulting in a 30% boost in user engagement and a 15% increase in satisfaction scores.

**Design Leadership:** Successfully guided design projects from concept through to completion, ensuring seamless integration with development teams and alignment with strategic business goals.

### Core Competencies

**User Research & Design Thinking:** Expert in conducting in-depth UX research and implementing design thinking methodologies to address user challenges effectively.

**UI/UX Design:** Proficient in creating intuitive and aesthetically pleasing interfaces using Adobe Creative Suite, Figma, and rapid prototyping tools.

**Cross-Functional Collaboration:** Strong ability to collaborate with engineering, product management, and marketing teams to align design solutions with technical and business requirements.

**Metrics-Driven Design:** Skilled in developing KPIs to analyze user behavior and inform iterative design improvements.

### Technical Proficiency

Knowledgeable in HTML, CSS, and JavaScript, facilitating seamless collaboration with front-end developers.

### Professional Experience

Spearheaded comprehensive user research and usability testing initiatives, directly informing and validating critical design decisions.

Designed and maintained scalable design systems that streamlined product development and ensured visual consistency.

Collaborated with cross-functional teams to integrate user insights into product roadmaps, enhancing both usability and business outcomes.

Led usability testing for MVPs, iterating designs based on user feedback to deliver fully functional products that met both user needs and business goals.
