Hyderabad, India

Senior Product Designer with **8+ years in product and UX** and **15+ years across design**. I work on complex B2B products, turning research, behavioral evidence and ambiguous requirements into clear product experiences, scalable systems and implementation-ready decisions.

My work spans enterprise dashboards, respondent experiences, design systems, product analytics and AI-assisted design-to-development workflows.

### • CORE CAPABILITIES

- Product Design & UX Strategy
- UX Research & Evidence
- Enterprise / B2B UX
- Data-heavy Interfaces
- Design Systems
- Design → Engineering Collaboration
- Accessibility
- AI-assisted Workflows

**Supporting** — Information architecture · Usability review · Security- and privacy-aware UX

### • CAREER EXPERIENCE

#### ● Senior UX Designer / Senior Product Designer · Enculture, NHR Technologies

Jan 2024 - Present

##### B2B SAAS · CULTURE ANALYTICS

🏆 Hackathon Winner 2025

- › Lead UX across culture analytics modules including program creation, respondent flows, dashboards, action planning, and role-based reporting.
- › Designed the respondent experience — how participants understand what a survey is for, whether it is safe to answer, and what happens after they respond.
- › Designed dashboard experiences that help HR leaders understand participation, survey outcomes, trends, comparisons, and action areas.
- › Identified friction and understood real behavior through analytics, client interviews, usability reviews, and stakeholder feedback, and recommended evidence-led design improvements.
- › Converted ambiguous requirements into structured UX flows, decision criteria, and reviewable design intent.
- › Worked directly with product, engineering, data, and leadership teams to align design intent with what could be built and maintained.
- › Turned recurring decisions into reusable product and design rules — tokens, typography, spacing, components, interaction states, and accessibility rules — reducing UI inconsistency across enterprise modules.
- › Applied security-aware UX principles across sensitive workflows, including privacy, role-based access, and data exposure prevention.
- › Supported AI-assisted design and frontend-ready prototyping where useful for faster iteration and engineering alignment.

**EVIDENCE** — Google Analytics · Microsoft Clarity · client interviews · usability reviews · stakeholder feedback.

#### ○ Product Designer · Clinic Mantra

Jan 2023 - Aug 2023

##### HEALTHCARE TECH

- › Redesigned multi-clinic appointment scheduling across web dashboards and mobile flows, reducing the booking flow from eight steps to four.
- › Improved task completion across patient and admin roles.
- › Applied secure UX patterns for sensitive healthcare workflows.

#### ○ UX Design Consultant · Estate96

Aug 2022 - Nov 2022

##### SMART ACCESS SOLUTIONS

- › Designed UX architecture for mobile, tablet, and wall-panel access control experiences, with flows for resident and admin roles.
- › Aligned interface behavior with hardware access logic and development needs.
- › Delivered end-to-end design and prototype within an 8-week engagement.

- **UX Designer** · Opia Labs

Nov 2019 - Jul 2022

**SAAS PLATFORMS**
  - › Led product design for Inwards, an emotion analytics SaaS platform for B2B customer insights.
  - › Structured emotional data into role-specific dashboards and insight views.
  - › Improved design handoff across multiple SaaS products through reusable component frameworks and standardized UX patterns.
- **UI / UX Designer** · Foyr

Apr 2017 - Nov 2019

**IMMERSIVE ARCHITECTURE TECH**
  - › Standardized UX architecture across interconnected 3D visualization products.
  - › Built reusable UI components for multi-product design consistency, improving onboarding for new designers.

**RECOGNITION** — MAXIMUS Award 2018, for cross-product UX contribution.
- **Graphic Designer & Design Trainer** · Multiple Ventures

2010 - 2017

Visual-design foundation — hierarchy, typography, layout, and brand communication — alongside training aspiring designers. Transitioned from visual design into digital product and UX design.

• **SELECTED METHODS & SYSTEMS**

**EVIDENCE-LED PRODUCT DECISIONS**

Combining analytics, interviews, usability observation and stakeholder evidence.

**PRODUCT EXPERIENCE PRINCIPLES**

Using clarity, trust, interpretation and action as review criteria across product experiences.

**DESIGN-SYSTEM GOVERNANCE**

Turning recurring UX decisions into reusable patterns, tokens and implementation guidance.

**PRIVACY-AWARE INTERACTION DESIGN**

Considering data exposure, role boundaries and sensitive workflows as part of UX decisions. Includes a responsible disclosure of client-side PII exposure.

• **SELECTED WORK**

**01 Three Questions Were Not the Problem**

Respondent experience · research · participation · trust — [craftlayers.com/work/respondent-experience](https://craftlayers.com/work/respondent-experience)

**02 Dashboard Explainability**

Enterprise UX · data hierarchy · interpretation · decision support — [craftlayers.com/work/dashboard-explainability](https://craftlayers.com/work/dashboard-explainability)

**03 Design Decisions → Implementation Rules**

Design systems · implementation · AI-assisted delivery — [craftlayers.com/work/design](https://craftlayers.com/work/design)

• **TOOLS**

**DESIGN & RESEARCH**

Figma

FigJam

Tokens Studio

Google Analytics

Microsoft Clarity

**IMPLEMENTATION COLLABORATION**

GitHub · React familiarity · TypeScript familiarity · Tailwind familiarity · Cursor · Vercel

**AI WORKFLOW**

Claude · OpenAI / LLM-assisted workflows

• **EDUCATION & CERTIFICATION**

**EDUCATION**

**Diploma in Game Art & Design** — AAG · 2009–2011

**Bachelor of Commerce** — Osmania University · 2006–2009

**CERTIFICATION**

**Foundation Course for UX Designers** — Interaction Design Foundation · 2018

**Design for Augmented & Virtual Reality** — Interaction Design Foundation · 2019

**Advanced Certificate Program in Cyber Security** — IIT Guwahati × Edureka · 2023–2024

• **AWARDS & RECOGNITION**

**Hackathon Winner 2025** · Enculture, NHR Technologies — recognized for Action Engine, a product concept supporting prescriptive retention interventions.

**MAXIMUS Award 2018** · Foyr — recognized for cross-product UX standardization and delivery impact.
